SUMMARY

I am a result-oriented front-end developer with experience building and maintaining responsive websites. Proficient in HTML, CSS, JavaScript, React, and RESTful APIs; plus modern libraries and frameworks.

PROFESSIONAL EXPERIENCE

FRONT-END DEVELOPER

U-Group Ltd. | Jul 2018 – Present

- Develop custom themes and utilize multiple languages/CMS for front-end development.
- Communicate directly with clients throughout length of project to establish project parameters, determine website content, produce sitemaps for client approval, and keep them updated with the progress.
- Test front-end code in multiple browsers to ensure cross-browser compatibility.
- Conduct code reviews to ensure code adheres to industry best practices and team guidelines.
- **Stack:** HTML/CSS, JavaScript, React, Wordpress

FRONT-END DEVELOPER

Advice Media | Oct 2016 – May 2018

- Edited and implemented a custom CSS grid system, with CSS media queries for mobile responsiveness.
- Designed and created call to action buttons.
- Restructured pre-existing templates using PHP.
- Worked with custom plugins, templates, and functions for Wordpress based sites.
- **Stack:** HTML/CSS, JavaScript, Wordpress, PHP

PHARMACY MANAGER

Smile Pharmacy | Jan 2010 – Mar 2015

- Filled and dispensed medications, along with creating quick codes for employees to use.
- Kept track of inventory and invoices, as well as negotiate prices with distributors.
- Trained new employees and managed employee schedule.

PROJECTS

COVID-19 NYC | A full stack web app to keep track of Covid-19 cases in NYC. |

<http://bit.ly/cov19nyc>

- Utilized React lifecycle methods with Webpack to dynamically render Covid19 NYC data.
- Designed and built a choropleth map of NYC divided by zip code using D3.js to help user visualize the data.
- Deployed a server to Heroku instance using Docker to provide a consistent environment.
- **Stack:** HTML/CSS, JavaScript, React, D3.js, Node.js, Express.js, Webpack, Docker, Loader.io

CAR IT | A mobile app that allows users track where they parked. |

<http://carit.info>

- Seeded a PostgreSQL database with parking geolocation and rendering directions back via Google Map API and Ruby on Rails.
- Created user accounts with sessions and Bcrypt.
- **Stack:** HTML/CSS, JavaScript, AJAX, jQuery, Backbone, Ruby on rails, PostgreSQL

VITAL NOTE | A SPA to keep track of blood pressure and glucose levels designed to help your PHP monitor your readings for accurate prescriptions. | <http://vitalnote.info>

- Displayed corresponding partials when tabs are clicked using route provider to switch between blood pressure and blood sugar records.
- Implemented filter to view readings for selected month using Angular directives.
- **Stack:** HTML/CSS, JavaScript, Angular, Node.js, Express.js, SQLite3, Browserify, Passport
